Shop Class as Soulcraft Matthew B. Crawford 2009-05-28 A philosopher/mechanic's wise (and sometimes funny) look at the challenges and pleasures of working with one's hands "This is a deep exploration of craftsmanship by someone with real, hands-on knowledge. The book is also quirky, surprising, and sometimes quite moving." —Richard Sennett, author of *The Craftsman* Called "the sleeper hit of the publishing season" by *The Boston Globe*, *Shop Class as Soulcraft* became an instant bestseller, attracting readers with its radical (and timely) reappraisal of the merits of skilled manual labor. On both economic and psychological grounds, author Matthew B. Crawford questions the educational imperative of turning everyone into a "knowledge worker," based on a misguided separation of thinking from doing. Using his own experience as an electrician and mechanic, Crawford presents a wonderfully articulated call for self-reliance and a moving reflection on how we can live concretely in an ever more abstract world.

The Fisher Body Craftsman's Guild John L. Jacobus 2013-07-01 The Fisher Body Craftsman's Guild was a national auto design competition sponsored by the Fisher Body Division of General Motors. This competition was for teenagers to compete for college scholarships by designing and building scale model "dream" cars. Held from the 1930s through the 1960s, it helped identify and nurture a whole generation of designers and design executives. Virgil M. Exner, Jr., Charles M. Jordan, Robert W. Henderson, Robert A. Cadaret, Richard Arbib, Elia 'Russ' Russinoff, Galen Wickersham, Ronald C. Hill, Edward F. Taylor, George R. Chartier, Charles W. Pelly, Gary Graham, Charles A. Gibilterra, E. Arthur Russell, William A. Moore, Terry R. Henline, Paul Tatseos, Allen T. Weideman, Kenneth J. Dowd, Stuart Shuster, John M. Mellberg, Harry E. Schoepf, and Ronald J. Will, are among those designers and design executives who participated in the Guild. The book also describes many aspects of the miniature model Napoleonic Coach and other scale model cars the students designed.

The Craftsman Richard Sennett 2009-02-05 Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

The Software Craftsman Sandro Mancuso 2014-12-12 Be a Better Developer and Deliver Better Code Despite advanced tools and methodologies, software projects continue to fail. Why? Too many organizations still view software development as just another production line. Too many developers feel that way, too—and they behave accordingly. In *The Software Craftsman: Professionalism, Pragmatism, Pride*, Sandro Mancuso offers a better and more fulfilling path. If you want to develop software with pride and professionalism; love what you do and do it with excellence; and build a career with autonomy, mastery, and purpose, it starts with the recognition that you are a craftsman. Once you embrace this powerful mindset, you can achieve unprecedented levels of technical excellence and customer satisfaction. Mancuso helped found the world's largest organization of software

craftsmen; now, he shares what he's learned through inspiring examples and pragmatic advice you can use in your company, your projects, and your career. You will learn Why agile processes aren't enough and why craftsmanship is crucial to making them work How craftsmanship helps you build software right and helps clients in ways that go beyond code How and when to say "No" and how to provide creative alternatives when you do Why bad code happens to good developers and how to stop creating and justifying it How to make working with legacy code less painful and more productive How to be pragmatic—not dogmatic—about your practices and tools How to lead software craftsmen and attract them to your organization What to avoid when advertising positions, interviewing candidates, and hiring developers How developers and their managers can create a true culture of learning How to drive true technical change and overcome deep patterns of skepticism Sandro Mancuso has coded for startups, software houses, product companies, international consultancies, and investment banks. In October 2013, he cofounded Codurance, a consultancy based on Software Craftsmanship principles and values. His involvement with Software Craftsmanship began in 2010, when he founded the London Software Craftsmanship Community (LSCC), now the world's largest and most active Software Craftsmanship community, with more than two thousand craftsmen. For the past four years, he has inspired and helped developers to organize Software Craftsmanship communities throughout Europe, the United States, and the rest of the world.
