Truth, Error, and Criminal Law Larry Laudan 2006-06-05 Beginning with the premise that the principal function of a criminal trial is to find out

the truth about a crime, Larry Laudan examines the rules of evidence and procedure that would be appropriate if the discovery of the truth were, as higher courts routinely claim, the

overriding aim of the criminal justice system. Laudan mounts a systematic critique of existing rules and procedures that are obstacles to that quest. He also examines issues of error distribution by offering the first integrated analysis of the various mechanisms - the standard of proof, the benefit of the doubt, the presumption of innocence and the burden of proof - for implementing society's view about the relative importance of the errors that can occur in a trial.

Criminal liability in regulatory

contexts Great Britain: Law Commission 2010-08-25 In this consultation paper, the Law Commission sets out the case for reducing the scope for criminal law to be used in regulated fields such as farming, food safety, banking and retail sales. Criminal sanctions should only be used to tackle serious wrongdoing and it is out of proportion for regulators to rely wholly on the criminal law to punish and deter activities that are merely 'risky', unless the risk involved is a serious one. There has been a steep increase in the number of criminal offences created since the late 1980s to penalise risk-taking. The areas regulated cover a wide range of risk-posing activities, and involve millions of people and thousands of

businesses. By turning to civil penalties for minor breaches, regulators could reduce costs to themselves and the criminal justice system by £11 million a year. In some cases, criminal prosecution can cost almost twice what the courts obtain in fines. The paper proposes that:

- (i) regulatory authorities should make more use of cost-effective, efficient and fairer civil measures to govern standards of behaviour;
- (ii) a set of common principles should be established to help agencies consider when and how to use the criminal law to tackle serious wrongdoing, and
- (iii) existing low-level criminal offences should be repealed where civil penalties could be as effective. Where criminal offences are created in regulatory contexts, they should require proof

of fault elements such as intention, knowledge, or a failure to take steps to avoid harm being done or serious risks posed.

Law Commission 1968 **Criminal Law, Vol. 2** Percy Bordwell 2018-02-10 Excerpt from *Criminal Law, Vol. 2: Instruction Paper* But of the two words, assault was much the more common and much the less technical. It was also much more convenient and less cumbersome than assault and battery, and so, except where technical exactness was necessary, it came to be generally used in its place. Thus its character as an attempt became less and less pronounced, and the criminal codes accelerated this by making many

assaults substantive crimes. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
