In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. xxxxxxxxxxxxxxxxxxxx Ideal for undergraduates with little or no science background, Earth Science provides a student-friendly overview of our physical environment that offers balanced, up-to-date coverage of geology, oceanography, astronomy, and meteorology. The authors' texts have always been recognized for their readability, currency, dynamic art program, delivery of basic principles and instructor flexibility. The Fourteenth Edition incorporates a new active learning approach, a fully updated and mobile visual program, and MasteringGeology(tm)--the most complete, easy-to-use, engaging tutorial and assessment tool available.

Principles of Igneous and Metamorphic Petrology John D. Winter 2014-01-13 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. For a combined, one-semester, junior/senior-level course in Igneous and Metamorphic Petrology. Also useful for programs that teach Igneous Petrology and Metamorphic Petrology. Typical texts on igneous and metamorphic petrology are geared to either advanced or novice petrology students. This unique text offers comprehensive, up-to-date coverage of both igneous and metamorphic petrology in a single volume–and provides the quantitative and technical background required to critically evaluate igneous and metamorphic phenomena in a way that students at all levels can understand. The goal throughout is for students to be able to apply the techniques–and enjoy the insights of the results–rather than tinker with theory and develop everything from first principles.

Extra Bold Ellen Lupton 2021-06-25 Extra Bold is the inclusive, practical, and informative (design) career guide for everyone! Part textbook and part comic book, zine, manifesto, survival guide, and self-help manual, Extra Bold is filled with stories and ideas that don't show up in other career books or design overviews. • Both pragmatic and inquisitive, the book explores power structures in the workplace and how to navigate them. • Interviews showcase people at different stages of their careers. • Biographical sketches explore individuals marginalized by sexism, racism, and ableism. • Practical guides cover everything from starting out, to wage gaps, coming out at work, cover letters, mentoring, and more. A new take on the design canon. • Opens with critical essays that rethink design principles and practices through theories of feminism, anti-racism, inclusion, and nonbinary thinking. • Features interviews, essays, typefaces, and projects from dozens of contributors with a variety of racial and ethnic backgrounds, abilities, gender identities, and positions of economic and social privilege. • Adds new voices to the dominant design canon. Written collaboratively by a diverse team of authors, with original, handcrafted illustrations by Jennifer Tobias that bring warmth, happiness, humor, and narrative depth to the book. Extra Bold is written by Ellen Lupton (Thinking with Type), Farah Kafei, Jennifer Tobias, Josh A. Halstead, Kaleena Sales, Leslie Xia, and Valentina Vergara.

Marketing Across Cultures Jean-Claude Usunier 2005 Back Cover Copy-Usunier "This book is noteworthy in its content and approach as well as in generating class discussion on intercultural marketing relations, exchange, and communications. With the diversity in world markets and the importance of having locally-specific understanding of markets and consumers, it is a welcome resource for teaching students who can either relate it to their own intercultural experiences or who have never had intercultural experiences themselves." Guliz Ger, Professor of Marketing, Faculty of Business Administration, Bilkent University, Turkey International marketing relationships have to be built on solid foundations. Transaction costs in international trade are high--only a stable and firmly established link between business people can enable them to overcome disagreements and conflicts of interest. "Marketing Across Cultures, 4e" uses a successful two-stage cultural approach to explore International Marketing. - A cross-cultural approach which compares marketing systems and local commercial customs in various countries - An inter-cultural approach which studies the interaction between business peoples of different national cultures "I used "Marketing Across Cultures" in courses in five different countries with students from more than 35 nations. The book provides a stimulating view on international marketing issues and at the same time allows in an excellent way to sensitize and train students for intercultural work, which has become the norm for most medium-sized and large companies." Prof. Dr. Hartmut H. Holzmuller., Chair of Marketing Universityof Dortmund, Germany Invaluable to all undergraduate, postgraduate and MBA students studying International Marketing and for marketing practitioners who wish to improve their cultural awareness, "Marketing Across Cultures, 4e" is essential reading. New to This Edition! Rewritten extensively in an effort to make the book as accessible as possible, co-author Julie Lee from Australia helps bring a Euro-Australasian perspective to the table. New materials includes: - The internet revolution and its impact on international marketing - Additional web references that allow in-depth and updated access to cultural and business information - New cases with web-based references, including Muslim Cola (Chapter 6), Bollywood (Chapter 8), BrandUSA: Selling Uncle Sam Like Uncle Ben's? (Chapter 14) and more! To access the robust web materials go to: www.booksites.net/usunier. Jean-Claude Usunier is a professor of Marketing and International Business at the University of Lausanne - Graduate School of Commerce (HEC) and at the University Louis-Pasteur (Strasbourg, France). Julie Lee is a Senior Lecturer in Marketing at the Graduate School of Management, University of Western Australia.

Monitoring Wilderness Stream Ecosystems 2001 A protocol and methods for monitoring the major physical, chemical, and biological components of stream ecosystems are presented. The monitoring protocol is organized into four stages. At stage 1 information is obtained on a basic set of parameters that describe stream ecosystems. Each following stage builds upon stage 1 by increasing the number of parameters and the detail and frequency of the measurements. Stage 4 supplements analyses of stream biotic structure with measurements of stream function: carbon and nutrient processes. Standard methods are presented that were selected or modified through extensive field application for use in remote settings.

Applications and Investigations in Earth Science Edward J. Tarbuck 2006 For the introductory Earth science lab course. Get Active Daniel Barry 2015-06-12 Active learning spaces offer students opportunities to engage, collaborate, and learn in an environment that taps into their innate curiosity and creativity. Students well versed in active learning - the capabilities that colleges, vocational schools and the workforce demand - will be far more successful than those educated in traditional classrooms. Get Active is a practical guide to inform your thinking about how best to design schools and classrooms to support learning in a connected, digital world. From classroom redesigns to schoolwide rennovation projects and new building construction, the authors show the many ways that active learning spaces can improve the learning experience.

The Earth System Lee R.. Kump 2013-07-23 For courses in Earth Systems Science offered in departments of Geology, Earth Science, Geography and Environmental Science. The first textbook of its kind that addresses the issues of global change from a true Earth systems perspective, The Earth System offers a solid emphasis on lessons from Earth's history that may guide decision-making in the future. It is more rigorous and quantitative than traditional Earth science books, while remaining appropriate for non-science majors.

Synthesizing Qualitative Evidence 2011 "Practitioners and patients are called upon to make numerous health care decisions and, in doing so, need to weigh various types of information before taking action. This information comes from a myriad of sources, including the results of well-designed research; information related to the preferences of patients/clients and their relevant others; the practitioner{u2019}s own experiences; and the nature and norms of the setting and culture in which the care is being delivered. Methods to synthesize qualitative evidence are now emerging and this text examines the methodological bases to qualitative synthesis and describes the processes involved in the conduct of a rigorous synthesis of qualitative evidence, with a particular focus on Meta-Aggregation."--[source inconnue].

Principles of Sedimentology and Stratigraphy Sam Boggs 1995 Aimed at advanced undergraduates but suitable also for graduate students and professionals, it covers processes of sedimentation, describes the characteristics of sedimentary rocks formed in major sedimentary environments, and discusses the fundamental principles of stratigraphy and basin analysis, including recent developments in the important fields of magnetostratigraphy, seismic stratigraphy, sequence stratigraphy, isotope stratigraphy, and sea-level analysis. The book presents divergent views on controversial topics and is extensively referenced and up-to-date thus encouraging students to refer to recently published literature.

Fanged Noumena Nick Land 2011-04-01 A dizzying trip through the mind(s) of the provocative and influential thinker Nick Land. During the 1990s British philosopher Nick Land's unique work, variously described as "rabid nihilism," "mad black deleuzianism," and "cybergothic," developed perhaps the only rigorous and culturally-engaged escape route out of the malaise of "continental philosophy" —a route that was implacably blocked by the academy. However, Land's work has continued to influence, both through the British "speculative realist" philosophers who studied with him, and through the many cultural producers—writers, artists, musicians, filmmakers—who have been invigorated by his uncompromising and abrasive philosophical vision. Beginning with Land's early radical rereadings of Heidegger, Nietzsche, Kant and Bataille, the volume collects together the papers, talks and articles of the mid-90s—long the subject of rumour and vague legend (including some work which has never previously appeared in print)—in which Land developed his futuristic theory-fiction of cybercapitalism gone amok; and ends with his enigmatic later writings in which Ballardian fictions, poetics, cryptography, anthropology, grammatology and the occult are smeared into unrecognisable hybrids. Fanged Noumena gives a dizzying perspective on the entire trajectory of this provocative and influential thinker's work, and has introduced his unique voice to a new generation of readers.

Susan E. Israel 2006-06-17 This volume provides the first comprehensive, research-based examination of metacognition in literacy learning. Bringing together research findings from reading, linguistics, psychology, and education, it is logically organized as follows: Part I provides the theoretical foundation that supports the teaching of metacognition; Parts II and III provide new methods for metacognitive assessment and instruction in literacy contexts at all grade levels; and Part IV provides new information on integrating metacognition into professional development programs. Key features include: *Chapter Structure. Teacher reflections at the beginning of each chapter illustrate teacher thinking about the chapter topic and metacognitive connections at the end of each chapter link its content with that of the preceding and following chapters. *Contributor Expertise. Few volumes can boast of a more luminous cast of contributing authors (see table of contents). *Comprehensiveness. Twenty chapters organized into four sections plus a summarizing chapter make this the primary reference work in the field of literacy-based metacognition. This volume is appropriate for reading researchers, professional development audiences, and for upper-level undergraduate and graduate level courses in reading and educational psychology.
