No Monkeys, No Chocolate Melissa

Stewart 2018-07-03 Everyone loves chocolate, right? But how many people actually know where chocolate comes from? How it's made? Or that monkeys do their part to help this delicious sweet exist? This delectable dessert comes from cocoa beans, which grow on cocoa trees in tropical rain forests. But those trees couldn't survive without the help of a menagerie of rain forest critters: a pollen-sucking midge, an aphid-munching anole lizard, brain-eating coffin fly maggots—they all pitch in to help the cocoa tree survive. A secondary layer of text delves deeper into statements such as "Cocoa flowers can't bloom without cocoa leaves . . . and maggots," explaining the interdependence of the plants and

animals in the tropical rain forests. Two wise-cracking bookworms appear on every page, adding humor and further commentary, making this book accessible to readers of different ages and reading levels. Back matter includes information about cocoa farming and rain forest preservation, as well as an author's note.

Touching Spirit Bear Ben Mikaelson 2010-04-20 In his Nautilus Award-winning classic Touching Spirit Bear,

author Ben Mikaelson delivers a powerful coming-of-age story of a boy who must overcome the effects that violence has had on his life. After severely injuring Peter Driscall in an empty parking lot, mischief-maker Cole Matthews is in major trouble. But instead of jail time, Cole is given another option: attend Circle Justice, an alternative program that sends juvenile offenders to a remote Alaskan Island to focus on changing their ways. Desperate to avoid prison, Cole fakes humility and agrees to go. While there, Cole is mauled by a mysterious white bear and left for dead. Thoughts of his abusive parents, helpless Peter, and his own anger cause him to examine his actions and seek redemption—from the spirit bear that attacked him, from his victims, and, most

importantly, from himself. Ben Mikaelson paints a vivid picture of a juvenile offender, examining the roots of his anger without absolving him of responsibility for his actions, and questioning a society in which angry people make victims of their peers and communities. *Touching Spirit Bear* is a poignant testimonial to the power of a pain that can destroy, or lead to healing. A strong choice for independent reading, sharing in the classroom, homeschooling, and book groups.

Habitats & Communities Natalie Regier 2005-01-01 Realizing the importance and fragility of the world's ecosystems is critical for today's students. Acid rain, global warming, the endangerment and extinction of a variety of plants and animals are real threats to our very survival.

Our unit takes a close look at the different habitats that make up the world's ecosystems, and the components of these habitats that make them unique. Our unit also examines aspects such as the adaptation of plants and animals to change, and the infringement of civilization. It is hoped that students will not only gain a better understanding of the world they live in, but may also be more concerned with protecting the fragile environment of which we are all a part of. This Animal Science lesson provides a teacher and student section with a variety of reading passages, activities, crossword, word search, and answer key to create a well-rounded lesson plan.
